*Extending your home into your garden*

## *Add comfort and shade to your garden...*

Sun awnings add shade and comfort to your garden and patio area. Available in a selected choice of high quality fabric designs and all sun awnings can be operated either manually or electrically.

Both electrically operated sun awnings can be integrated into your home automation and can be operated by either remote control from a single held transmitter or from a switch fixed to your wall.

The system is available with sun, rain and wind sensor built into the electrically operated version so even if your away from home, your sun awning will be of benefit to you in many ways.

All the profiles are manufactured to the highest standards with a fully finished White polyester powdercoated finish to the full cassette which houses the fabric when not in use and all the products are tested to TUV standards.

The high quality coated fabric range which are available in 300g hard wearing polyester with some of the fabrics also available in 300g acrylic fabric . We offer an extensive choice of single solid colours or striped fabric and are fully dyed thread throughout, eliminating premature fading.

All sun awnings come with a 2 year guarantee , and a choice of matching valance to each awning is optional but enhances the finishing touch to your sun awning. Each awning is available on a made to measure basis and widths are available from 1.5m ( 4'9" ) up to 6m ( 19'8" ) with projections of each awning from 1m ( 3'3" ) up to 4m ( 13' ) respectfully.
